Cambridge. Jan. 22, 1857.

Dear Engelmann -

I meant to have answered yours of Dec. 18. 1856 before this. — but at the date of the last it seems you had not got my letter giving a list of my determinations of Pl. Lindh. up to the end of September

I have been waiting for the localities, & the nos. included in brackets ( ). You ask me to send the nos. by mail — but it is written only on one side of thick & coarse paper — waste heat — paper — & very costly — accupying much bulk — would cost $5.00 by mail. — Besides I will send you proofs the printer to work on it. — & you must minute corrections for me to make at the end. — I want to get it off — The printing shall go on slowly.

I have advices of the boxes shipped from St. Ol. to Boston.

There should be a full collection of Lindh. pl. for Smithsonian Institution. — like Hansen's which & how shall it be. Can you take some set you have — & add [illegible] part of those of former collection — to make say $50. — Besides I have yet I do all. left. If Mr. Barry does not take his I will take that for Boothman — If he does I must have some other pretty full one. —

0 1 2 3 4 5 6 7 8 9 10
cm
copyright reserved
MISSOURI BOTANICAL GARDEN

Package by Jones Express is sent to Worthen
If the boxes come in time I can send to London
by our Boston Packet Ship without much extra
to Harvard directly

Your instructions should have been
printed before — But if you will prepare
it, I will have it printed, with the title
page for the extra copies — which I have
ordered 150. That will answer all our
purpose. — In the Boston Journal, it may come
at the end.

I have looked over your oaks, with pleasure
& shall set aside in my herbarium — & send
you to form any opinion. —

Lovell should pay for the Greff plants & so
must willing to do so — I only meant that
you should not draw on him until the
advance is repaid. —

Look over account to
see how you stand, & the balance, including
the Greff plants, at the price you mention — & then
I will send Lovell's bill. — just give me a memo. I
get the cash
on a separate slip of paper, & I will have
at once for you.

I thought I had written you before that
the Smithsonian Inst. did want a full set
of Pl. Lindh.

I never could get any account at all from

Wiley for the Pl. Geyer sets — He never seemed able to tell how many he had sold, did he sell more — probably — than the value of the books you had given him? If so I'd order some more & then dispose them to him in his bill. Enough.

I have mailed you Asa's address by himself — to you — lectures —

I must go abroad in June or July — have the asclepiad. to — all ready for printing, — You can send back proofs, corrected by me then. If you have done with the Bulandrier is probably the Utah plant. Nothing yet larg in warm climate & does nothing.

I hear nothing from Bowen yet. — Probably I shall have to collect it next summer in person. Schedules names must be recopied. when we can all founded.

As to the prospects about 'jabber' it is not for a little me. We are childless, & so far as I can see like to be — thro'. I wonder at it — unless a sea-voyage should have some effect.

In great haste

Yours ever

A. Gray

South ave^t
Woolley —

Cambridge. Feb. 12th. 1849.

Dear Doctor E.,

I have your letter post-marked Janry. 25th — The Ship General Taylor, though a long time adowsid from New Orleans, has but just arrived; I have not received the boxes yet, but hope they may come out today; and that I shall get them & be able to tell you of their condition before I despatch this letter. I am sorry they did not arrive 10 days ago, when I was sending a box to London; but I will try & get the London packages off as soon as possible, though it may not be until the 5th. of next month —

Wright's collections have just arrived. I am quite surrounded by them, & so far well pleased — There are some new things & many of the old familiar things of Wislizenus & Gregg — I have not looked through them all yet — There are not a great many specimens of a sort — A number of live Cacti which I wish you had to name — Probably they are all familiar to you — They are mostly small — Shall I send you a share of them?

I have not yet written to Schlechtendal about Pastor Scheele — I want to send him a list of Scheele's names with ours by the side of it —

This story about the manner of Endlicher's death was at first current & afterwards contradicted, but perhaps your informant is correct—

I have Endlicher's Pines, & Jen. Sup. 4, part 2 — The Pines I have bound up with other things of Endlicher's; it is not large, & presently I can lend it to you, for I suppose it is not to be had in the country—

I am printing along the Pl. Lindh. & wait anxiously for the localities of the last year's collection. The printing goes on slowly— It was impossible to wait longer to begin—

As to the money accounts between us, the difference chiefly seems to be that I had not credited you with $9.20 for Jordon's plants— Did that include Jordon's plants, both for me & Mr. Lowell, or only Mr. Lowell's, & what was the sum of each? I thought I had accounted for mine, but see no memorandum of it— And Lowell's I supposed you would charge him with in your account against him—

Give me in your next a statement of what Lowell is to pay, including Jordon plants, Scoggs, Lindheimer's, &c. That I may get it from him before he goes abroad, which is to be the 1st. of April—

In distributing Bright's plants I will try to secure at least a portion of those things which are likely to be new & useful to you— Though the sets will not run very full.

I have laid aside for you Memoir of Am. Acad. Vol. IV part 1 - ($1.50)

Feb. 22.

Dear E.

The sickness & death of a cousin of my wife's who was passing the winter with us, as an invalid, has kept back this letter.

I expect Schmidt at Bamford & $9.43. - (which I assume $1.43 for the smallox for Garden) (What can I send Rickl, that he would like to have? Let me know.) leaving $8. charged to you.

Post I mean to get this back from the Publishers. - have charged Greene 75 cts for it. - & Saml. Carey 50. - John Carey sends word that he is too poor to give up the idea of taking the set addressed to him. S. T. Carey then you take his ($35.50 + 50 cts charge = $36. which I have from him) & I hope to take the no. 30 for Martha - will see when the next steamer gets in. Greene has not yet paid. - but will any day. - & I have not heard from Cleveland Olney is at the South. till June. I retain here. till he gets back

Harvey's

say May - from the South.

Your letter with notes & localities came in good time for corrections after Linnaeus - I wish I had it before. The printing seems to go on slowly. I have had no proof for a long while. The Minosa acanthocarpa Var. I put a fragment to Martha. who thinks it distinct. - & I call it M. Lindheimeri.

Your Passion flower. I have had for nearly 2 years from Wright. The leaves are very various. I dare say it is new. - Shall of course adopt your name. But the leaves are extremely various in form, the lower sometimes 4 lobed. -

Immediately on receipt of this. please to make out an account against Mr. Lovell, as asked above - that I may collect it. -

Yours ever.

A. Gray

Rec'd March 18 '50
Ans March 27 "

Cambridge - March 4th. 50.

My dear Engelmann,

On Saturday last I received your letter containing copy on Cactæ, just in time for that very evening I put it up for the printer -

In Wright's collection I found some fine ripe fruit of No. 404, and drew up a character for it as a new genus, but your name Dactyosma is a better one & I shall adopt it - The ripe fruit has each mericarp equally ten-ribbed, the ribs in pairs - But in Lindheimer's it appeared more as you described it, namely 5 broad ribs, which I conclude become double - There are some other points which I shall carefully compare with your description & make a new character for the printer - It was well your manuscript came when it did or mine would have been already in the printer's hands - It is odd you have got none of my sheets yet, I have sent you three -

The Fedia Stenocarpa I write alter according to your last, & see too F. amarella - Which you will see by the character cannot be F. Woodii - Passiflora tenuiloba has gone to the printer I will look after it again in the proof - Your fine Echites I have had for a year from Wright, & have again fine specimens in his & Pass collection, both flower & fruit - Thank you for your correction about the gender of the word osma - "Cassia pumila" is a pre-occupied name - I have put up the pages R. Tendl. Cactæ to send to Salm Dyck by Wednesday

0 1 2 3 4 5 6 7 8 9 10
cm
copyright reserved
MISSOURI BOTANICAL GARDEN

steamer, & will send the new matter as soon as printed.

You are quite right. After Compositæ we will append characters of the new things of Lindheimer's 1849. But send them on quickly. The box with the foreign sets is on board a ship which sails tomorrow for Liverpool. I have left it at Hooker's to send immediately to the subscribers, or to put in the hands of an agent. I take No. 22 for Bentham, £29.00, & have charged myself with it. S. T. Carey has 19. (J. C. being unable as I wrote you) & I reserve 31 for the Smithsonian. That will do well for them as they will have a full set of Wright's, which contains so many Texan things. But remember them for full sets hereafter. 32 I put in the box to put on sale in England. Don't pay Riley until he furnishes an account of those packages.

Schultz. Bip. works at Compositæ a good deal. See Walper's Report. I will send anything to him I can. Whereabouts is Zweibrucken?

We have an idea of running this autumn through Belgium, Holland & up the Rhine; when, if in the way, I will see what Compositæ the Schultz has got. And at Frankfort where I once spent two hours(!) I shall have time to make my bow to the Senkenberg Society, who have lately sent me a diploma, probably owing, I think, to your kind recommendation.

What Springs do you recommend, those of Nassau?

Bentham has kindly promised to help me about naming the Eu. Ex. plants. So that we shall take to work with him at Hereford almost as soon as we get to England. Take a little run in autumn, as I said, then winter in London, where there is much to do; & Paris in early Spring, then to Rome

if possible, though hurriedly, & thence back by way of Switzerland & Northern Germany -

In England I can best finish Tendler & Lindheimer; but give me all the families you mean to work out & take with me -

I did not hear from Brown or Bodt last steamer; I hope to next week -

I was very much interested with your little domestic account you may be sure -

Mr. Lowell greatly wants to know what he is to pay - He is ready to hand over just what you say -

Yours faithfully,

A. Gray

A. Gray

P. S. Any last, a week or two ago, apprised you of the safe arrival of all the boxes & the live plants in good condition, & I asked you what I should send Richl -

Dec 1 — May 6 46
Aug May 15

Cambridge, April 24. 1850 —

Dear Engelmann

How long it is since I have written to you — I have been watching for a chance — I when — a fortnight ago yesterday + I was able to get away to Washington (whence I have just returned with a very severe cold) I took your letters with me to answer while I was away — but not a moment of time did I find in which to write you. It shall be done now, before I sleep. — I was sorry to leave home just when Mr. Kinnan was expected here according to your letter. But I must placed in a friends hands — all the cash I had for you (including that from British Museum received the very Day I left) — viz. $ 400.70 — to balance our account. — And dropped a letter into the Boston P. Office & another into the N.Y. Post Office ~~offering Kinnan~~ requesting Mr. Kinnan to call at the place designated — leave parcel for me — take the cash and a parcel for you. — But as yet nothing has been heard of him, nor do I get any note from him, stating where he is to be. I am anxious you should have the Cash & the parcel. And if Kinnan does not appear I shall remit the first by some other channel, & send the 2d by Express.

Enclosed is a statement of account. Drawn up at the time, which I trust you will find correct, & according to your statement. I have credited the Gardner Plants.

Hooker writes me that Watt is now in England. I hope he has paid Stewart by this time for Fendler Plants. also for Lindheimer. — I am to sail from Boston for Liverpool on the 5th June. — I will then look after the cash due you in London — & settle them up. — and as I assure I will order my agent in Boston to pay over to you. As to printing of M. Lindheimer, they got stopped, after 4 sheets of the printing office. — From some cause or other work. & I was so hard pushed in writing & printing the new ed. of Bot Text Book at another office, that I did not go down to urge them, but connived at the delay. But I made them begin again, before I want to Washington. & have read 2 proofs since my return — the 2d just beginning your Mss. of Cactea. They are now going on — & I must keep them steadily at work till they finish.

Before I go, I begin the printing of the

0 1 2 3 4 5 6 7 8 9 10
cm
copyright reserved
MISSOURI BOTANICAL GARDEN

first part of Pl. Wrightianae, in Smithsonian Contrib.—(to be printed here in Cambridge) — shall take some proof with me to revise in England — & shall send back more mss. after Bartl. has named the Mimosea &c. —

I will take with me the rest of Lindheimer, Fendler, & Gregg's Plants (& Mistizenos if you choose) — will name them there, & send you back a list of Greggs &c. — Having brought all up to end of Compositae, what think you of combining all beyond in one mass — citing the numbers distributed under in brackets sic — (Fendl. 550) (Gregg. 240), (Lindh. 650), &c.!

About Blennella. Torrey asked me why I did not make the correction & publish the new species. — Because both he & you about the same time furnished me with indications, but neither have decided whom shall be used. — Nor has Torrey ever sent me Pl. Characters. I asked him to do so — & he said he thought you would, & was anxious not to stand in your way — Pray arrange it speedily between you. & give me data all ready for the printer. If you are not in time for the appx to Pl. Lindh., I will put it in Pl. Wrightianae, & this summer will see at Geneva what is the real C. Mexicana.

Accounts — I trust old balance is all now right in enclosed statement. If not please point out & will correct.

I saw you had omitted the $30. from Lowell for Greg's — But I did not post it. Taking your statement in your letter as a basis, I told Lowell he should pay you $55. — which he handed me. I did not ask him anything for seed — he has had so few of them. But I have ~~paid~~ got (see 8. in account) $20 — for them & and I will get some more when those of last year come from Kinsman — tho' I cannot take much just now — we are so drained — But hereafter there shall be more coming for Lindheimer from us.

With some difficulty I succeeded in getting eggs of silkworms in connecticut (culture of silk, abandoned. [illegible] the month.) — They were sent in a letter from Hartford March 18.22 (Nothing to pay) — addressed to Lindheimer, as you directed

MISSOURI BOTANICAL GARDEN

Prof Blankland, to whom I wrote an arrival of plants of Linden, replies that he has been ruined bankrupt or nearly so, by this son & could not pay for the plants. — this he wants them much, & begged me. I took that sch. there for me, to Washington, for Smithsonian (no. 28), for which I received (or am to receive) $36.15 — which I have credited in your account, annexed.

I do not care for Maranthaceae Panama plants — but if you send Gepp. & — I will get them named at Burkhan's or Hookers.

There are some Loranthaceae in the parcel for you — of Wight's collection. — a note marked narrow leaved Rhododrum among them. — Would it not be as well to leave the nos. of these things Acanthaceae. to Arcuthobia. & — for the papers on Wight Plants? — in which named in text calls Gepp — & — as I there can have plates ad libitum. — but none in Bot. Zoon. Mat. Hist

Thanks for the corrections of the proofs of Pl. Lind. — To-morrow I will go over the sheets printed. & make the corrections —

At Starkville I want to see Riley about those plants on sale Laccaut. I found to my surprise that he had failed some weeks before.

He says that of the 7 sets, 3 are on hand at Starkville. the thinks one or 2 at London still. — Promised to find out & arrange against my return from N. When I get back I had only 3 hours in Starkville; but I found the dilatory man had done nothing at all! He promised to turn over the 3 sets to Putnam to be forwarded to me — But whether he will or no I am not sure; When I settle my account with him (I suppose I shall lose a few dollars) I will remember your account too. I am sorry but, looks as his status or I should have taken. thanks all for you.

I want to see your new plants, Shall I send you my yams. cover plantis St. Sun. (not large, nor very cool) to keep while I am away. When I get yours I will study it at Hookers &.

In former letter I meant to say — "please send copy (Mss), all worked out, of families you wish to elaborate yourself, in Monsptotalia, & beyond." — And I will arrange for Mss — & probably Print too — while abroad. — I want to take with me anything there may be this side of Xmas = prita. — The rest can be sent me to reach me in London October 1 — You can send through Geo. P. Putnam. 155. Broadway, New York — Best letters please to mail at once, under cover to Sir Wm J. Hooker, Royal Botanic Gardens Kew, near London (Postage & I will do the same). Write Prof Brown that I hope to see him early in August, at Stirling, — when I can pass only a day or two, however.

There is not printed Catalogue of our Garden — nor in Mss. either. I wish I knew what to send Reichl. Give me some idea what he would like that we have & I will send such orders that they may be sent early the enclosed to anything we have. —

Cambridge, 3d. May 1850

Dear Engelmann

Yesterday I got your line sent by Kinnear — and to-day I went into the place appointed — & found there the parcels & seeds for Self & Hooker — (3 for each), with the 2 lists, — but nothing of the parcel Lindh. Plants of 1849. — Sorry, as I had kept back the mss. & Corrigenda from the printer — but now I have sent it as we can no longer delay; I left a line for Kinnear enquiring about this parcel. — I left for him the parcel (formerly advised) to take into town — (I have not distributed the rest of M. Wight, yet) — also a cheque on a Boston Bank for $400.70 — on your account. — To-morrow I send in specimens of the Live Cactæ of Wight. — and each — I suspect nothing new or rare. —

The seeds for Hooker will go by next steamer to him.

I cannot pay for more the garden to pine — but will do so next fall or winter. —

I see I shall accomplish no more than to get one (or two) Plants of M. Wightiana set up & united before I leave — just to get the model settled. — so that I can send back

Hartford March 18th 60

Dr. A. Lyons

Dear Sir.

I have, this day, sent a package by mail to Texas according to your direction, containing, it is estimated, about ten thousand silk-worm eggs. I obtained them from Mansfield in this State, and could obtain more, if needed.

I thought it best to send them in one parcel because they came to me so. well done up in a small paper box and well secured. I was afraid, if I separated them from the paper I might crush some. Besides, I had waited so long for them, that I wished to keep them off hatching as long as possible, as a temperature of about 70 hastens them.

I hope they will reach in safety, as I have taken every precaution to have them properly prepared & packed. I have requested Mr. Lindheimer to let me know if they reach him.

I suppose Mary has left you. Give my love to Jane. I suppose you are very busy. As for me, I am tired & shoulders deep in our Spring cleaning.

Yours. J. P. Brace.

May 10. 1875

Dear E.

Mr. Kinnear called day before yesterday and left with me the parcel of Plants, which he had forgotten to leave at Chacis, with the rest! — I now am putting in, at the close the needful points as limits assigned me by 40 papers or so. — I have (Jones's little paper) for a note in Al. Mightiana. — I see Harvey has been at work as them formerly. I have pen him (Boulter. Mex.) C. Mexicana & C. Boulteri)

— Linum rupestre. Engelm. I reinstate. In many respects as much like L. Virginianum as L. Bottii. Your original label affixed to my specimen — with notes is written in your handwriting "Linum rupestre Lindh."!

"Passiflora tribba." : there is one of Ruiz. & Pavon. I change the name to P. affinis. — as there is also a P. sylvestris — too near P. mexicana. —

May 17th. —

Dear E.

I got stopped here — Can now. I can only say that yesterday I got 4 more Linnaeus — have been nine times in the way — only

one bit of Schuch's that stock, an Salviastrum, hairy in the throat:- a new Brazilia, & a few other Salvias - one of which S. Castia, certainly is not new. I send to-morrow, with this, the no. by mail to you - Permit it to Sullivant when you have done with it. The proof of Pl. Lindheimeriana - miss to [illegible] pages. I shall soon have the extra copies out - will send to Lindheimer, as you desire. I will take copies to Brain. &c —

The owners have just changed the time of sailing of ship in such a way that we shall sail on the 10th (instead of 5th) of June. —

In haste

Yours ever

A. Gray

I have before had your C. Arcana from Texas, & thought it a form of Clematis viorna - only glabrous. — I shall examine presently.

Dear Engelmann—

On Saturday I got your favor of the 15th.—

I have written you, I believe that we sail on the 18th June— 5 days later than we expected.— in Miss Plymouth Rock for Liverpool

I have only time for some hurried notes. & thanks for your getting ready the Mattey Historians, &c.—

To day I mail to you one copy of M. Linth. (also one to Lindheimer.—addressed as you direct, to him at N. Br. Comale Co. Texas) & inclose you 5 more with a parcel of Mich Plants. such as I could secure for you— Add the Wolfgridge, Euphorbias. &c & such things I send the parcel to—morrow by Adams Express.

I will divide N. Mexico. with Wooton all I can. of Mich.

I have from Bentham by Steam Asters and Brassica & Arabica— many quite new.—

Your Epixiphium Fendleri. I have in Mich. Call. & was struck with it. but still thought it a Marsupia when I distributed it. If new it must be Fendleri— & figured—. But Fendler must have an genus which is above suspicion. We will see what. Bentham thinks of the genus.

I have some very

0 1 2 3 4 5 6 7 8 9 10
cm
copyright reserved
MISSOURI BOTANICAL GARDEN

well-marked new genus of N. Mexico - from Wright, if this should be suspicious.

Stokes's Cuscuta. Grapp's pl. &c - Whatever you wish me to have. Just up carefully & send to Geo. P. Putnam, 155 Broadway, Newyork who will forward to his London agent for me against I get back in Sept. I will try to collect the Dues for Faudel & Lisle - & to get portraits, in England. What shall I privately offer the remaining collections for?

We will not disturb the account with Mr. Lovell on account of the Genera - send him plants when you have anything he wants - & let go in part against the seeds furnished partly to him & partly to garden here.

I doubt if Mr. Wace sent any directions about raising the silk-worms.

Thus far my repeated efforts are unsuccessful in getting anything from the plants left over from Riley. But I have now put the matter into Putnam's hands to do what he can -

I hope you will like the new edition 1st part of

Bot. Text Bk, ed. 3 —— Address me in England, under cover to Hooker at Kew. Hooker has handsomely announced the new Lindheim. collections in Journal of Botany

Consign Riehl to Mr. Sprague — who takes the garden — Hales general charge of very near the garden — during my absence — I will speak to him that he is to be well looked after, and I will leave orders that he is to have anything he wants that we can furnish, free of charge — Sprague will take him to Hovey's also —

I will take 15 copies Pl. Lindh. to Barn. & notify him of my coming. — & send the rest, as you direct.

Maladendron is good botanical use of malacos. for soft surface. Mrs Bentham has just made an Acacia malacophylla, from one of Wright's. Glad of the letter from Hookerius Rex.

Roots of Pl. Wrightiana will all be dried but you — Not time to fill a sheet yet — But I hope to to-morr. —

Torrey has furnished some notes on Nyctaginaceae — but worked up little. I have a fancy to do them myself — Some fine things in Wright's coll.

MISSOURI BOTANICAL GARDEN

I am much grieved to hear from Torrey of Gray's sad loss!

Vasey is in Washington — doing little, but waiting for me. I will tell him what you intend for him.

Plainly distinct is Viola Canina from Asgrestis — I do think Torrey too, now — Habit, & inflorescence very diff.

Perhaps you will find the Talinum linearifolium of the Mss. sent Mats you by Kunze.

Good night.

Yours ever

A. Gray

Boston June 9. 1880.

Dear C.

We are off to-morrow morning —
My last from you is May 28th —

As to Euphorbias. (of which you sent me
notes) I have some new species & a revision of
N. Am. species in MSS. long ago prepared for
the Flora of N. America —

I have copied all the notes there are of
Wrights. on Cacti — sent as dried specimens. —
mention to me any numbers annexed to live
specimens — & I will send locality —
Some of Asclepiadeae — & Cuscutineae &c &c —
I have not had time to copy out. — have been
hard pressed.

With the live Cacti was your MSS. Asclepiads.
I have sent. or have with me, copies of W. Lists.
— for marks all you mention — & will see to the
rest. from the extra copies I take with me.

I sent you a box in a parcel by Express.
Shall I find a letter from you at Workis? — Write
first to Braun at Stirling. I hope to be there
by end of July or early in August. — Yours ever Asa Gray

Dear Engelmann

Your favor of 31st May was handed me on ship-board yesterday — just as the weather decided to keep us here another day.

Of course we will gladly pay transportation & all charges on live plants from Lindheimer. The best time to send from Texas is in their early spring. Feb'y or March, to reach us in Apr. April or May. Address to me case of Cunningham Brothers, Boston.— announcing by letter what is sent, & how,— that the box may be turned over to the gardener, and not forwarded to me.

The Rhamnacea in letter is, I believe, my Ziziphus lycioides A. Gray. The "Euphorb. shrub" I always took for a Bottia or Stillingia. It is in Gregg's coll.— & found by Wright in Rio Grande &c.—

I am going to have Buttam do up the Leguminosæ of Wright &c.— I fear I shall fill his house with Dried Plants. 12 boxes.

I have the 2 specimens of Rubiaceæ in Wright's coll.— But I must break off.— & go on board.

Yours ever. A. Gray

Geneva. August. 16. 1850

My Dear Doctor.

At Your letter addrest to Prof. Braun reached me here at Geneva, about 10 days ago. I snatch some moments, as I can find them to give you news of us. — for I am very busy here, as you may imagine.

We sailed, you know, the 11th of June (it is very strange that I did not acknowledge the safe arrival of your box containing the Nisticzenus plants etc. in one of my last letters) We had a pleasant voyage in a sailing packet, made land in 12 days. — but did not get into Liverpool until the 18th. — very well.

Coming down thro' England, we stayed in London till the 16th July. — saw Mother Brown, etc. etc. — and then crossed from Dover to Ostend. — Bruges, Ghent, Antwerp. — much delighted with these old Belgian towns. — the old cathedrals, the pictures of the early Flemish Masters. &c — But Mrs. Gray left England with a slight inflammation in one eye, & looking at pictures, & churches made them much worse, and has given us a good deal of trouble. We gave up Brussels, — stopped a night at Louvain, & went on to Cologne & Bonn: saw Nees von Esenbeck, and Dr. Koenen, — who was very attentive & kind.

MISSOURI BOTANICAL GARDEN

He has sent to Schenke for the plants he has described, and they are to be at ~~Mrs~~ Bonn against my return, when I am to look them over. I am glad you have seen some of them yourself.

We went up the Rhine to Coblentz. Bingen. Lorraine — thence to Frankfort. By some mistake in the Post. Office in giving me the address, your letter to Dr. Fresenius I took to a Law Dr: Fresenius — who was away in Switzerland. So I gave up all hopes of seeing him, and we failed to seeing the sights by ourselves, when a few hours before we had arranged to go to Heidelberg. the ~~two~~ true Dr. Fresenius came in. We may see him again on our way back. We went to Heidelberg — (for an hour or two only) — at Kehl crossed for the day to Strasburg. Saw Schimper & and went on to Freiburg, where we stayed from Friday night to Monday noon, and had a delightful visit. We were delighted with Braun and his family, and he was extremly kind to us. He is going to Giessen. Coming on to Basle, the state of Mrs. Gray's eyes made it important that she should have some time to rest very quietly

that place would of course be Geneva, where I could work in Debandolle's Herbarium. and settle many questions. Before we came on via Neuchatel (where we stopped a day), and here I have been at work, seeing many duplts & making some curious discoveries. I have worked chiefly in Compositæ.

Meanwhile, Mrs Gray's eyes have recovered, and we have made an excursion to Chamouny.

It is now the 20th. - time passes fast. - I work to-day in Herb. DC. & Boissier. - & to-morrow morning we go to Freiburg & Berne & the Bernese Oberland. We cannot be back now to England so early as we expected. - but still hope to be there by the 20th September. - Write me to the care of Messrs. Brown, Shipley & Co. Liverpool.

The sending you copies of Pl. Lindh. addressed to Rannel et - et - was a mistake. - Erase the names, and use the copies as you need. I have supplied all these people by mail, if I mistake not. I hear you have much cholera in St. Louis. - of course you are very busy. Take the best care of yourself - for your life is very valuable. Just receive the Wright plants from me, I only wish you could have had more of them all the rest of Pl. Hindsl. sets - of which you write - are to me at London - the two Portmann, & I could get rid of them all I doubt not at £1. pr. hundred.

If Boissier get only a short set of Hindsley & Lindheimer sets. - would be glad of large ones - in any future distribution

endeavour to write you again from Munich, or from Bonn. I am have little time now & cannot stop to tell of some curious Discoveries in Botany we met with in W. Va. —

Believe me to remain

Ever yours faithfully

A. Gray

Pontilas House, Hereford
Oct. 16th. 1850.

My Dear Engelmann.

I write from the hospitable roof of Mr. Buttham, — where we arrived on the evening of the 1st Oct. — and where I have been at work, as hard as possible, at plants, to my great advantage, the whole time! — thus far at Expl̲o̲ring Expedition collections alone — which are not ¼ of the way through yet. As soon as we have run through them in our through way, we will take up Texas, New Mexican & Mexican.

I trust you got, long ago, my letter from Geneva — written after the receipt of Yours at Bonn — with Braun's, — Well, after our delightful tour in Switzerland, and a hurried visit at Munich, we hurried on down the Rhine, anxious to keep our appointment with Mr. Buttham — to Holland and thence to England, which we reached on the 25th. Sept. —

I stopped at Bonn one night: but found Römer and every one away — & no parcel of Schuler's plants left for me. I can write for them still, & hear from Bonn here — if worth while. Schuler is still at work, and has been at Gnaphalium & Dasyphinum in a late Linnaea — but he has only one species of Dasyphinum — fortunately.

MISSOURI BOTANICAL GARDEN

I will try to write you more botanical news presently. Just now I can only settle up some matters of business with you —

During the 5 days I had in London I saw Howard, & he handed me the enclosed account, and paid the net sum £ 24.12.6. — This I owe you — deducting first the 4.15.0 which (the last item belongs to Oakes' estate. = £ 20.17.6.

Besides this I have for you. from Lemon 6.2.0
" Hooker - 7.10.0
Both for Lindheimer sets. — = £ 35.9.6

which at $4.84 the £. = = $169.70 say $170. — for which amount please to draw on John A. Cunningham, (Cunningham Brothers) Central Wharf, Boston — who has instructions to honor your draft for that amount.

There yet remains to come from Brit. Museum £7.10 G. Watson Taylor £.6.05, Nebb. £7.10. Fielding £7.10. — = £ 28.10. — of which that of Nebb & Taylor, coming through Howard will be subject to commission. — The rest will be paid to me. But the Museum is slow. Nebb I know has sent instructions to pay. — Taylor is out of the country. When I get back to London I shall try to dispose of the rest of Fendler — the odd set of Lindheimer — to collect & forward the whole amount to you. I shall make Brown pay up for Brit. Museum when I get back. + stir up Howard —

I will write again very soon. Do not fail to draw for the £170. or advise Cunninghame where to pay it to in Boston to your credit, or Timmins. — I like to hear from you here, even in answer to this, address your letter under an inclosure to Messrs. Brown, Shipley & Co. Liverpool — who forward to me wherever I may be — — or send to Cunninghame Brothers, Boston — who forward to me — keep my bankers at Boston.

In usual haste — I am very well indeed. — very strong with the exception & travel; & Mrs. Gray also quite well & pretty strong — very materially benefitted. —

Yours faithfully

Asa Gray
